2. Our exhibition overview

Our exhibition location : Booth No. 21-11

Exhibition Overview : We will showcase and demonstrate solution products for stable power supply for people involved in mission-critical data center operations.
[English speaking staff available]

(1) EnerSys product (US):

[The Alpha DC48 CXPS W DC power supply system](#), with its compact design tailored to data centers, and the [SBS series](#), the top of the line in pure lead VRLA storage batteries, have been installed in Japan with over 200,000 units sold over the past 15 years.

(2) PowerShield product (NZ):

[PowerShield8](#): A battery monitoring system that improves reliable operation management and investment effectiveness of backup power batteries.

PowerShield8 has a track record of implementation in large-scale data centers both in Japan and overseas.

(3) SYMJA battery monitoring service:

[SYMJA Battery Monitoring Service](#): A cloud service that centrally manages the battery status of generators, controls, etc. at multiple locations. A free trial campaign is offered for this service.

* Cooperating companies:

- EnerSys Japan
- PowerShield Ltd.
- Kawamura Electric Industrial Co., Ltd.

Our exhibition booth location (21-11): The closest entrance is the 4th Hall entrance.
